Introduction

1.1 Purpose

The purpose of this document is to define and provide details for accessing API for Gati Shakti system information (information about nhno and stated available in Gati Shakti system) from ULIP system. This document details the following points:

1. **Data Integration between GATISHAKTI and ULIP web service:** Identification of operational points where data integration between **GATISHAKTI** and ULIP web service will be needed.
2. **Technical Approach** for performing Data Integration

The Overall Description

Users will share information such as **NH number** based on data sent by user ULIP system will call respective **GATISHAKTI** API for accessing information.

Following are the points for accessing vehicle information: -

1. This API will share data based on information provided by users.
2. ULIP will expose API for getting data from GATISHAKTI API.
3. **GATISHAKTI/02** API will take NH number from user and get data from GATISHAKTI API.

1.2 Data Integration between GATISHAKTI System and ULIP application

Users will share information with the ULIP system based on data shared ULIP will provide data to user.

1.3 GATISHAKTI/01

This API will take **NH (national highway) number** and connect with GATISHAKTI API to get data.

S. No.	Field Name	Field Description	Format	Required/Not – Required	Length
1	nhno	Enter the NH number as available in GATISHAKTI system.	[A-Z]{2}-[A-Z0-9]{1,4}	Required	7

1.3.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide **NH number** for which detail is required.
3. GATISHAKTI API will share details of national highway road information which exist in GATISHAKTI system in JSON format.
4. GATISHAKTI Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example: NH number **NH-71** is shared by ULIP system, then GATISHAKTI-integration will make a request to GATISHAKTI API.

Request: The request must be of the following format, where national highway (NH) number is passed within the URL body in JSON format.

1.4 GATISHAKTI/02

This API will take **stateid number** and connect with GATISHAKTI API to get data.

S. No.	Field Name	Field Description	Format	Required/Not – Required	Length
1	stateid	Enter the stateid number as available in GatiShakti system.	[0-9]{1,10}	Required	Min=1, Max=10.

1.4.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide **State Id number** for which detail is required.
3. GATISHAKTI API will share details of road information which exist in GATISHAKTI system in JSON format on the basis of State Id.
4. GATISHAKTI Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example: State Id number **19** is shared by ULIP system, then GATISHAKTI-integration will make a request to GATISHAKTI API.

Request: The request must be of the following format, where state ID number passed within the URL body in JSON format.

1.5 GATISHAKTI/03

This API will take **stateid number** and connect with GATISHAKTI API to get data.

S. No.	Field Name	Field Description	Format	Required/Not – Required	Length
1	stateid	Enter the stateid number as available in GatiShakti system.	[0-9]{1,10}	Required	Min=1, Max=10.

1.5.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide **State Id number** for which detail is required.
3. GATISHAKTI API will share details of industrial park location which exist in GATISHAKTI system in JSON format on the basis of State Id.
4. GATISHAKTI Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example: State Id number **19** is shared by ULIP system, then GATISHAKTI-integration will make a request to GATISHAKTI API.

Status Code 200: GATISHAKTI data response
Status Code 400: Bad request (Invalid json syntax, invalid json key)
Status Code 401 or 403: Unauthenticated or Unauthorized
Status Code 500: Some internal server errors occurred
Status Code 502: Server is not responding.

1.6 GATISHAKTI/04

This API will take **stateid number** and connect with GATISHAKTI API to get data.

S. No.	Field Name	Field Description	Format	Required/Not – Required	Length
1	stateid	Enter the stateid number as available in GatiShakti system.	[0-9]{1,10}	Required	Min=1, Max=10.

1.6.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide **State Id number** for which detail is required.
3. GATISHAKTI API will share details of toll plaza NHAI which exist in GATISHAKTI system in JSON format on the basis of State Id.
4. GATISHAKTI Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example: State Id number **12** is shared by ULIP system, then GATISHAKTI-integration will make a request to GATISHAKTI API.

Request: The request must be of the following format, where state ID number is passed within the URL body in JSON format.

1.7 GATISHAKTI/05

This API will connect with GATISHAKTI API to get data.

S. No.	Field Name	Field Description	Format	Required/Not – Required	Length
1	N/A	N/A	N/A	N/A	N/A

1.7.1 Technical Approach

1. All the data will be shared through rest web services.
2. ULIP system will provide detail is required.
3. GATISHAKTI API will share details of national corridors information which exist in GATISHAKTI system in JSON format.
4. GATISHAKTI Integration will add JSON in **response** key in response body.
5. ULIP system will provide the data in JSON Object format in response body.

Example: Data is shared by ULIP system, then GATISHAKTI-integration will make a request to GATISHAKTI API.

Request: The request must be of the following format and passed within the URL body in JSON format.

For Staging: <https://www.ulipstaging.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/05>

```
{}
```

Curl URL

```
curl --location --request POST 'https://www.ulipstaging.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/05' \
--
header 'Authorization: Bearer eyJhbGciOiJIUzUxMiJ9.eyJzdWliOiJ1bGlwliwiaWF0IjoxNjg2NTQ5MjU4LCJhcHBzIjoieZGF0YXB1c2gifQ.WHgXZU1OUlcZHVh0I5QN5MA6IBkYn608rz82HnVaOlXMEplwleFUzdsM95BfNnyCy07cKCzmViFAkeTxr4GY9A' \
--header 'Content-Type: application/json' \
--header 'Accept: application/json' \
--data-raw '{}'
```

For Production: <https://www.ulip.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/05>

```
{}
```

Curl URL

```
curl --location --request POST 'https://www.ulip.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/05' \
--
header 'Authorization: Bearer eyJhbGciOiJIUzUxMiJ9.eyJzdWliOiJ1bGlwliwiaWF0IjoxNjg2NTQ5MjU4LCJhcHBzIjoieZGF0YXB1c2gifQ.WHgXZU1OUlcZHVh0I5QN5MA6IBkYn608rz82HnVaOlXMEplwleFUzdsM95BfNnyCy07cKCzmViFAkeTxr4GY9A' \
--header 'Content-Type: application/json' \
--header 'Accept: application/json' \
--data-raw '{}'
```

For obtaining authentication token, refer [Section 1.5](#)

Response

1.8 Data Transmission & Authentication Mechanism

All data exchange would be done over secure HTTP (HTTPS). Request from ULIP's system would be made in GATISHAKTI system through a data exchange URL that has following form:

For Staging: <https://www.ulipstaging.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/01>

```
{"nhno":"NH-38"}
```

Access to above data exchange URL would be authorized by use of a security mechanism implemented by the ULIP system. It is as follows:

- **First time access:** It would require a username and password [which would be shared with user beforehand]. Once user hit with valid user id and password, ULIP system will return a basic authorization token to user, using that token user will communicate with ULIP system until token will not get expired.

Summary of HTTP Basic Authentication is as follows:

First time User hits ULIP secured API through username and password for access token as follow-

```
curl --location --request POST
'https://www.ulipstaging.dpiit.gov.in/ulip/v1.0.0/user/login' \
  --header 'Accept: application/json' \
  --header 'Content-Type: application/json' \
  --data-raw '{
    "username": "xxxx",
    "password": "xxxx@123"}'
```

Authorization:

Bearer

```
eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJ1bGlwliwiaWF0IjoxNjgyNDkyNzQ1LCJhcHBzljoiZGF0YXB1c2gifQ.iNjO9ggx99yqkjJw65KKP7dZ9zVatpuQQP76rVBnxxArEYq8QZIn48_ihG8ECe34wKm3QTcokX7wrq9RDwZrbA'
```

Upon successful authentication, the user would be logged into the ULIP system and get an access token. Though this token user can communicate with ULIP. This token has expiry time which represents user session. The session time out for the same to be fixed hour, generally it is for 30 minutes. If there is no request coming from user for 30 minutes, then session (token) will be expired, and user need to re authenticate.

Using The above token, users can request ULIP system for cargo details as follow -

```
curl --location --
request POST 'https://www.ulipstaging.dpiit.gov.in/ulip/v1.0.0/GATISHAKTI/01' \
--
header 'Authorization: Bearer eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJ1bGlwliwiaWF0IjoxNjgyNDkyNzQ1LCJhcHBzljoiZGF0YXB1c2gifQ.iNjO9ggx99yqkjJw65KKP7dZ9zVatpuQQP76rVBnxxArEYq8QZIn48_ihG8ECe34wKm3QTcokX7wrq9RDwZrbA' \
--header 'Accept: application/json' \
--header 'Content-Type: application/json' \
--data-raw '{"nhno":"NH-55"}'
```
